ACADEMIC HISTORY

University of Gondar

BACHELOR OF SCIENCE |
OCT-10-2014 - JUNE-30-2019

B.Sc of Electrical and Computer Eng.
GPA: 3.47

WORK EXPERIENCE

Tutor/Developer

10ACADEMY | NOV-23-2023 - CURRENT

- Provided expert tutoring in cutting-edge domains, including data science, web3, machine learning, and generative AI.
- Developed an AI-powered chatbot for Redash, a data visualization tool, enabling seamless natural language access.
- Crafted a contract analysis chatbot using Retrieval-Augmented Generation (RAG), empowering users to leverage AI for contract review.
- Designed a prompt generation application that generates tailored prompts based on user inputs, enhancing productivity and creativity.

React Internship

KOSMOCLUB INC(STEALTH) COLOGNE, GERMANY|AUG-01-2023 - NOV-10-2023

- Developed a comprehensive health tracking application, featuring medication reminders, integration with external health APIs, and a conversational AI assistant for health-related discussions.
- Contributed to an ongoing project that provides users with a platform to engage in friendly conversations with AI characters created by others, including Stripe payment integration to support creators.

Software Developer

ZOWITECH | NOV-20-2020 - MAY-05-2022

- An e-commerce movie subscription website with Wordpress where more than 10000 users visits.
- A discussion platform that can be used between a company and its client.
- Engaged in doing a relational database with Laravel using SQL for an app that connects investors with different startup companies.
- Worked on website maintenance and other different website implementation.

CERTIFICATIONS

- Certification in react internship program
- Certification in sales and marketing
- Certification in data science, machine learning and web3 engineering
- Certification in backend engineering(nodejs)
- Certification in solidity programming from encode
