

GRACE NYOKABI NYUTU

GENERATIVE AI ENGINEER

A junior Generative AI Engineer with a robust background in object-oriented programming, model training, Python, data structures and algorithms. Demonstrated expertise in fine-tuning, Retrieval Augmented Generation (RAG), complemented by skilled data engineering abilities in ETL, data preprocessing and visualization.

EXPERIENCE

Machine Learning and Generative AI Engineering Trainee

10 Academy 2024

- Automated storyboard synthesis for digital advertising using Autogen agents for image composition and grading.
- Engineered prompts for GPT-4 and GPT-3.5 to evaluate prompt effectiveness.
- Developed a chatbot to convert human-like questions into SQL queries, facilitating data extraction and visualization.
- Built scalable data infrastructure for NLP projects using transformer models, Python, and GPUs.

Business Administrator

KenExports, *Luton*. 2023 - 2024

- Streamlined business processes for collection of goods and coordinated drivers using transport allocation models, reducing business costs by 30%.

Software Back end Engineer

Demand Solutions Limited, *Nairobi*. 2022

- Set up mobile phone-based money transfer services (*MPESA*, *Airtel Money*) APIs for customer payments into the Vend app using Python and SQL skills. This helped customers to pay for their orders via the mobile phone based money transfers which increased transactions volumes by 60%.

Ass Underwriter Resolution Insurance, Nairobi. 2019-2020

Sales and Marketing Agent

CIC Insurance, Nairobi. 2016-2018

PROJECTS

Precision RAG

Streamlining Prompt Engineering and Enhancing User Interactions with Language Models (LLMs) through Automatic Prompt Generation, Evaluation Data Generation, and Prompt Testing and Ranking.

Semantic image and text alignment

An automated storyboard synthesis for digital advertising. It uses computer vision, NLPs alongside LLMs to facilitate the creation of detailed, dynamic content.

Redash Chatbot add-on

Redash add-on that combines Flask, PostgreSQL, and OpenAI's GPT-3.5 Turbo for advanced data analytics. It enables non-technical users to easily fetch and visualize data using natural language processing and SQL translation

TECHNICAL SKILLS

- | | |
|------------------|---------------|
| • Python | SQL |
| • CI/CD pipeline | OOP |
| • Langchain | React |
| • RAG-Pipeline | Prompt Design |
| • Fine-tuning | Tokenization |

SOFT SKILLS

- | | |
|-----------------|---------------------|
| • Collaboration | Problem Solving |
| • Negotiation | Design Thinking |
| • Communication | Decision making |
| • Leadership | Time Management |
| • Presentation | Conflict Resolution |

EDUCATION

Generative AI

10 Academy
California, USA 2024

Software Engineering

Moringa School.
Nairobi, Kenya 2021-2022

Business Management (Management Science)

Kisii University. 2011 - 2015

Diploma in Insurance

College of Insurance 2010 - 2012
