SUMMARY

Adaptable Full Stack Developer skilled in MEVN Stack and Python, enthusiastic about open-source software. I excel at understanding needs and creating collaborative solutions. Comfortable working in teams, I specialize in user-friendly design and reliable systems. Committed to community collaboration, I actively contribute to open-source projects, embracing innovation and continuous learning.

SKILLS

Programming Skills: Python, Flask, C, CSS/TailwindCSS, Vuejs, Nodejs

Backend Tools: RESTful API, MySQL, MongoDB, Express

EDUCATION

B.S. Electrical and Computer Engineering
Addis Ababa Science & Technology University

Addis Ababa, Ethiopia
09/2016 - 09/2021

ALX Software Engineering Program
ALX Africa

02/2022 - 02/2023

EXPERIENCE

Frontend Developer

10/2021 - 12/2021
Addis Ababa

LSSYA online Counselling

- Engaged in the complete development lifecycle of an online counseling system, contributing to its design, implementation, and enhancement.
- Collaboratively designed and strategized wireframes and sitemaps based on user feedback, ensuring an intuitive and user-centric experience.
- Developed a captivating landing page for an online counseling chat app, effectively communicating its purpose and features to engage users.
- used Vuejs and Tailwind CSS to craft elegant components and landing pages, enhancing the visual appeal and functionality of the web application.

Full stack Developer

08/2023 - 12/2023
Location

MMCY TECH

- Built several small projects using Tailwind CSS and Vue.js, giving them a neat and functional design.
- Spearheaded the development of the job portal section within the company's Applicant Tracking System (ATS). This innovative addition resulted in a noteworthy 40% decrease in labor requirements, streamlining the recruitment process significantly.
- Implemented strategic enhancements to the existing ATS, particularly in the creation of a robust job portal. This transformation yielded remarkable results, cutting down the time-to-hire by an impressive 50%, contributing to a more efficient and agile recruitment workflow.
- Acknowledged with the Best Project Presenter Award for delivering standout presentations, showcasing exceptional communication abilities and a compelling presentation style.

EXPERIENCE

Opensource Intern

12/2023 - 03/2024

Remote

Openstack

- Identified and resolved issues pertaining to documentation and user messages within the OpenStack Manila project, contributing to the overall quality and user experience of the platform.
- Enhanced the user interface of the Manila project by implementing a new workflow using Django views, thereby streamlining the share network creation process. Ensured comprehensive unit test coverage, leading to a significant increase to 90% coverage in the manila-ui project.
- Introduced Pre-commit and tox configurations in manila-ui, simplifying code formatting and adherence to standards, easing development and code pushing for developers.
- Collaborated with core reviewers in OpenStack to merge patches within the release cycle timeline, ensuring timely integration of enhancements and fixes.
