OBJECTIVE

A data engineer who takes pride in building and monitoring data processing systems. She is proficient in Python and SQL. She understands software engineering fundamentals and has worked with programming languages and frameworks including, JavaScript, React, Next.js, Tailwind CSS, and TypeScript.

PROFESSIONAL EXPERIENCE

Front End Developer Volunteer

Immer, Remote | July, 2023 – November, 2023

- Developed an entertainment platform web application using Typescript, Next.js 13, and Tailwind CSS, ensuring cross-browser compatibility and responsive design.
- Collaborated with a team of developers to design and implement responsive and visually appealing web interfaces using HTML, CSS, and JavaScript.
- Utilized TypeScript to improve code maintainability and scalability while enhancing productivity.
- Worked closely with UX/UI designers to ensure seamless integration of design assets and optimized user experience.
- Employed Git for version control, enabling efficient collaboration and code management within the team.

PROJECTS

Uzima Fitness Web App

- Developed a web application for fitness enthusiasts to explore and search for various exercises.
- Implemented frontend functionality using React.js and Tailwind CSS for styling.
- Integrated with the wger.de API to fetch exercise data, including names, descriptions, categories, and equipment.
- Utilized useEffect and useState hooks for managing component lifecycle and state management.
- Implemented search functionality allowing users to search for exercises by name, category, or equipment.

TECHNICAL SKILLS

- Programming Languages: C++, Python, Typescript, JavaScript, HTML, CSS, SQL
- Web Development Frameworks/Libraries: React, Next.js, Tailwind CSS, Redux, Redux Toolkit
- Version Control: Git, GitHub
- Tools & Technologies: Visual Studio Code, JSON, Trello, Figma, ESLint
- Operating Systems: Windows, Linux
- Database Systems: MySQL

EDUCATION

Software Engineering | 2022-2024

ALX Software Engineering Program, Remote.

Curriculum: Low-level programming in C, Higher-level programming in Python, Fundamentals of system design, SQL, Bash Scripting, Rest APIs, React Fundamentals, Redux, Redux Toolkit

Bachelor of Science in Geomatics Engineering and Geospatial Information Systems | 2016-2022

Jomo Kenyatta University of Agriculture and Technology, Kiambu County, Kenya.

Relevant Curriculum: Computer Programming in C++, GIS Programming in Python, Database Systems, Javascript

CERTIFICATIONS

Certificate of Course Completion in Google Cloud Platform | 2023

Google Africa Developers Scholarship Training Program (GADS)

Certificate of Course Completion in Software Engineering | 2024

ALX Africa
