

1. Background in computer science. And have been working as a software developer for quite a while. My experiences has blend this building application so far.
2. My experience in power bi is more like familiarity, so I would say I am beginner level on it. I don't have any professional experience with the tool, but I have used it in project assignments. In pet projects.
3. My approach to getting details is. Taking the classes priority by priority. And requirement by requirement in order define going each on each requirement one by one.
