

Abraham Teka

Ambitious Junior Generative AI Engineer with 2 years in full-stack development. Certified in Microsoft Azure and Amazon AWS. Completed Generative AI engineering course at 10 academy, specializing in RAG, vector DB, LLMs, and prompt design.

WORK EXPERIENCE

Custor Computing

Full stack Developer

Ethiopia, Addis Ababa (Full-time)

DEC 2023 - PRESENT

Full stack developer for rebuilding a legacy drivers and vehicles licensing & control system that's been running for more than 20 years to a modern web based system.

- C# .NET core, Entity Framework ORM and SQL Server for backend development
- Angular, Material design DevExpress and Tailwind css for the UI development.

Nedamco Africa

Junior Cloud Consultant

Ethiopia, Addis Ababa (Remote)

DEC 2023 - MAR 2024

Built a carbon footprint calculator project using C# and WebForms and deployed it on Microsoft Azure.

- Configuring and deploying requirements on Amazon AWS S3, EC2, Lambda, VPC, RDS, elastic beanstalk and load balancing.
- Configuring and deploying given assignments on Azure VMs, Virtual networks, Active Directory, DB and Functions.

eTech S.C,

Full stack Developer

Ethiopia, Addis Ababa (Full-time)

SEP 2022 - NOV 2023

Full stack developer in the development and maintenance of a comprehensive CRM and Insurance solution utilized by over 20 branches, sales teams, and customers at Zemen Insurance. The live system can be accessed at

<https://portal.zemeninsurance.com/>

- Systematized motor, and fire and lightning premium calculations, proposal submission and policy generation.
- Develop features for proposal, schedule, endorsement, and policy documents generation and printing.
- Implement SMS and email communication services

PROJECTS

LLM-based Chatbot for Advanced Data Analytics and Visualization (2024):

Developed a chatbot to streamline data querying using natural language. Integrated Redash with LLMs for intuitive data analysis. Enables faster decision-making and insights generation.

Precision RAG: Prompt Tuning For Building Enterprise Grade RAG System (2024): . It is an automated tool designed to assist users in generating multiple prompt options based on their input descriptions of tasks, objectives, and scenarios.

Core Insurance Solution (2022 - 2023): Designed and implemented premium calculations, proposals, notifications, and policy generation. The system serves over 20 branches on a daily basis, increasing staff performance by 30%.
