

Junior Data Engineer with a strong background in Software Engineering, including database design, object-oriented programming, algorithms, data structure and python. Skilled in data processing, integration, visualization and analysis. Proven experience in building data warehouses, efficient data pipelines and ELT process.

Experience

DevOps Engineer, Fox Events Jan 2024 -

Responsibilities

- Implemented a user-friendly interactive form that reduced abandonment rates by 20%, increasing submission completion and enhancing user experience for customers and vendors.
- Developed and automated an email delivery system that streamlined vendor requirement processing, improving efficiency by 35% and eliminating the need for paid services, resulting in annual cost savings of approximately \$850.
- Optimized internal processes which contributed to a 35% increase in overall operational efficiency, allowing the team to focus on more critical tasks.

Chief Technology Officer - CTO, Kесе Events May 2023 - Jan 2024

Responsibilities

- Launched applications on the Play Store, achieving over 100 downloads, which drove a 61% increase in user engagement through innovative app features.
- Led a team of 3 engineers in developing a livestreaming feature, enhancing the app's functionality and user experience.
- Implemented strategic initiatives that strengthened the online presence and engagement metrics, fostering a community around the app.

Education

- Bachelor of Science - Computer Engineering, Hawassa University -
- Certificate in Generative AI, Machine Learning and Data Engineering, 10 Academy -
- Certificate in Entrepreneurial and Business Operations, Jasiri4Africa -

Projects

Building an Efficient Retrieval Augmented Generation (RAG) System for Legal Document - Q&A Chatbot, Project Link

- Developed a comprehensive Retrieval Augmented Generation (RAG) chatbot designed for legal documents, enhancing user access to legal information by simplifying complex retrieval processes.
- Integrated backend services using FastAPI and built a responsive frontend with React, delivering a seamless user experience that catered to legal professionals.
- Evaluated multiple RAG configurations, optimizing performance which resulted in a 30% increase in response accuracy and speed.

Redash LLM Chatbot for Advanced Data Analytics, Visualization, and Insight Extraction, Project Link

- Created a user-friendly LLM chatbot that translates plain English queries into SQL, empowering non-technical stakeholders to access analytics without prior coding knowledge.
